Experience

Bank Central Asia — Fullstack Web Developer

01/2022 - Present

Developed, tested, and maintained critical financial features for the web application of Bank Central Asia, one of Indonesia's top four banks.

Implemented and optimized key functionalities including fund transfers, payments, purchases, multicurrency management, security features, and user notifications.

Collaborated with cross-functional teams to ensure seamless integration of financial and non-financial components.

Utilized Angular and Java Springboot to deliver high-performance, secure banking solutions.

Bank Central Asia — Enterprise Architect

10/2017 - 12/2021

Led architectural transformations across the organization's ecosystem, enhancing cross-division collaboration and efficiency.

Formulated and disseminated technology stack recommendations, establishing guidelines for internal development projects.

Implemented a comprehensive asset and license management system, including automated alerts for relevant divisions.

Drove initiatives resulting in significant reductions in development lifecycle risks, efforts, redundancies, and costs.

Provided data-driven insights to support strategic planning and decision-making processes.

Education

Bina Nusantara University —Computer Science Degree

06/2013 - 06/2017

Information Technology Major. Graduated with High Distinction, GPA: 3.66/4.00.

Certification

Pearson VUE — TOGAF 9 Enterprise Architecture Practitioner

11/2021

Toolbox

Figma, HTML, CSS, JavaScript, Bootstrap, ReactJS, Angular, NodeJS, SpringBoot, MongoDB, PostgreSQL, Jenkins, PCF, Dynatrace, Kibana
